Parameters:

Products consist of either one or two hot dip galvanized bended steel tubes in size Ø38x2mm. Different shape 19mmHDPE panels are installed on these tubes and create the visuality. The bended steel tubes create the stability in the products. Either a product consist of only one bended tube (only sold for supervised areas), a support leg for more stability is linked to the basic frame. The "in-between modules" are roofs, benches, disks, tunnel or nets. Finally the stability in the fences, consist of two vertical steel tubes. Slides are either stainless steel or vacuum formed polyethylene. Different modules could be linked together as a cluster.

Tested according to:

DIN EN 1176-1:2008
EN 1176-1:2008
DIN EN 1176-3:2008
EN 1176-3:2008
